Subject: Addition of CIEG 655 Civil Infrastructure Systems to the DISA PhD Program

Dear Professor Trainor:

The Department of Civil and Environmental Engineering supports the addition of CIEG 655 Civil Infrastructure Systems as an option in the area Science and Engineering of Disasters. Several DISA students have taken this class over the past seven years and they found the class useful, as well as contributing a different perspective, which is valued by the other students.

Please let me know if you have other questions.

Sue
