RE: Masters in Nursing - Health Systems Leadership

Lerner College is pleased to support the new Masters in Nursing - Health Systems Leadership degree. The students in this program will take three of our MBA core courses:

- ACCT 800 Financial Reporting and Analysis
- BUAD 820 Fundamentals of Analytics
- BUAD 870 Managing People, Teams, and Organizations

We have sufficient capacity in these courses to support the Nursing Program's Masters degree students. These courses are offered each Fall and Spring semester and are available in our online MBA program as well.
