Dear Alisha,

It was a pleasure meeting you at the panel and learning more about the MSHN program. As discussed previously with Jillian, our department is in full support of students in BHAN's programs enrolling in MMSC's *Medical Biochemistry* course. The clinical and nutrition relevant correlations provided in the context of biochemistry make this a good choice for students in the health professions.

Please let me know if you need a formal letter of support for your curriculog submission.

Kind regards,

Esther
