Subject: Support for 4+1 programs leading to an MS in Data Science

Dear Richard,

As Chair of the Department of Physics and Astronomy, I am happy to support the proposed 4+1 programs leading to an MS in Data Science. The faculty voted overwhelmingly to support this 4+1 option as well. Specifically, our department can accommodate the additional, projected enrollments in PHYS graduate courses that may be used as elective courses associated with the MS in Data Science.

We look forward to this new cooperative offering.

Sincerely,

A handwritten signature in blue ink that reads 'Edmund R. Nowak'.
